

We know electronic communication!

We handle many different standards for EDI with our customers and suppliers.

By using the EDI-service from Viaduct we have the possibility to use reliable electronic communication with several of our customers or suppliers through their business-system.

This makes us flexible in our choice of business partners and gives us the opportunity to provide the best product and service possible.

Some of the standards and formats that we can handle:

Ways of communication

- FTP/FTPs
- sFTP/SSH
- OFTP2
- AS2
- Peppol Network

Print/labels

- Odette
- Global Transportlabel (GTL)
- VDA4902
- VDA4939
- IAE3

Formats

- EDIFACT
- VDA
- X12
- Misc XML-format
- Peppol
